

Until the middle of 2022 following activities have been implemented:

- All rearing containers have been completed
 - Planning for the second insect breeding facility is in full progress
 - madebymade organized the first international "BSF Breeders Summer Camp", a networking meeting for insect breeders to jointly tackle challenges in the insect
 - End products in various sizes were developed and are available in regional retail outlets
 - Many regional markets were visited by the team, attention was created for madebymade as a regional waste recycler and producer
- madebymade received a visit from Mrs. Pfirrmann, neemo monitoring expert, and Mrs. Schumanova, CINEA project manager
